RAM ROD® HD Fishing Rod Holder with Bulkhead/Flat Surface Base

Part #: RAP-433-BMP **UPC:** 793442955280 **Patented**

PRODUCT INFORMATION

OVERVIEW

The RAM ROD® HD Fishing Rod Holder, compatible with both spinning and casting reels, is specifically designed for rugged environments and large fishing rods. It features a rotating ring to keep your rod in place when traveling and a swing arm rod stop that can convert it into a tube style rod holder. A hexagonal attachment point makes the rod holder compatible with the C-Size and B-Size hex ball bases. This configuration includes a 6" spline post and bulkhead/flat surface mounting base. The RAM ROD® HD is also GoPro® compatible – just attach your GoPro factory mount directly to the rod holder or use the Double Ball Mount to attach any action camera. If you want to mount your phone to utilize your mobile fishfinder app, use the Double Ball Mount with X-Grip®.

SPECIFICATIONS
